

MATHS - COMPARING

More, Less or Equal

Ten sheets of comparisons, then the symbols

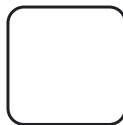

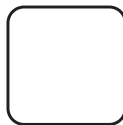

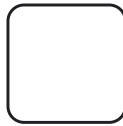

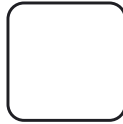

More and less come before greater than and less than, and a child who has only met the symbols will guess at which way round they go.

The first five sheets ask for the words. The last five introduce the symbols, with the same pictures underneath so the meaning carries over.

A4 - black ink only - ages 5-7

Which group has more?

Count both groups, then write more, less or equal in the box.

Which group has more?

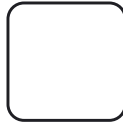

Count both groups, then write more, less or equal in the box.
