

REASONING - VISUAL DISCRIMINATION

Find the Odd One Out

Twelve sheets, from obvious to genuinely hard

Spotting that one shape in a row is not like the others is the same skill as spotting that one letter in a word is wrong. It is visual discrimination, and it is worth practising before it is needed for reading.

The early sheets change the shape. The later ones change only the size or the angle, which is much harder to see.

A4 - black ink only - ages 3-6

One is a different shape

Circle the one that is not like the others.

One is a different shape

Circle the one that is not like the others.

One is a different shape

Circle the one that is not like the others.

One is a different shape

Circle the one that is not like the others.

One is a different shape

Circle the one that is not like the others.

One is a different size

Circle the one that is not like the others.

One is a different size

Circle the one that is not like the others.

One is a different size

Circle the one that is not like the others.

One is a different size

Circle the one that is not like the others.

One has been turned around

Circle the one that is not like the others.

One has been turned around

Circle the one that is not like the others.

One has been turned around

Circle the one that is not like the others.
