

REASONING - PATTERNS

What Comes Next?

Twelve sheets of repeating patterns, AB to ABCD

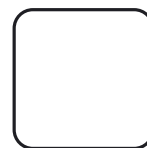

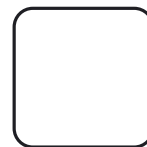

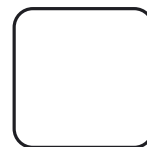

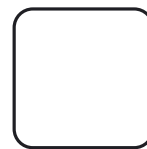

A pattern is the first piece of algebra a child ever meets: a rule that keeps going, which they have to work out rather than be told.

The book runs AB, then AAB, then ABC, then ABCD, and finishes with patterns that change size rather than shape - which is the one most children have to think about.

A4 - black ink only - ages 4-7

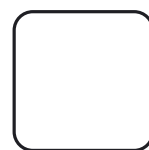

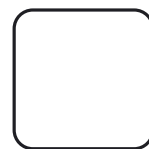

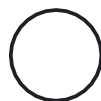

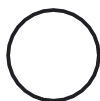

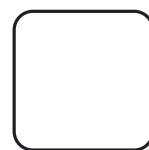

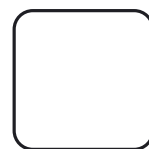

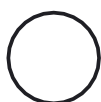

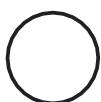

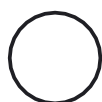

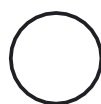

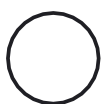

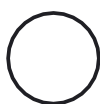

Pattern: AB

Look at the pattern, then draw what comes next in the empty box.

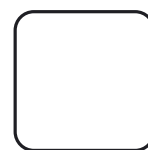

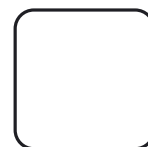

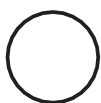

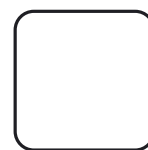

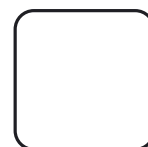

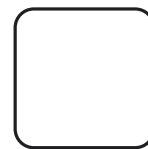

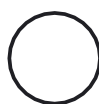

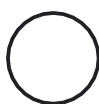

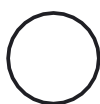

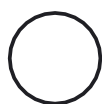

Pattern: AB

Look at the pattern, then draw what comes next in the empty box.

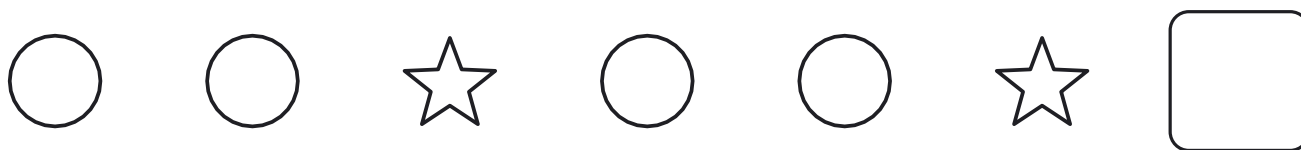

Pattern: AAB

Look at the pattern, then draw what comes next in the empty box.

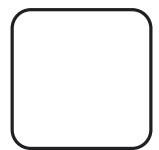

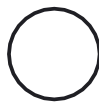

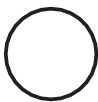

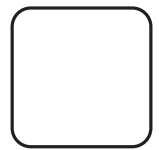

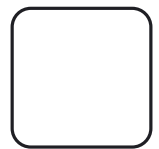

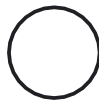

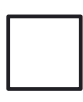

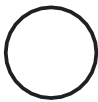

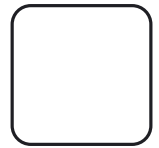

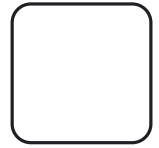

Pattern: AAB

Look at the pattern, then draw what comes next in the empty box.

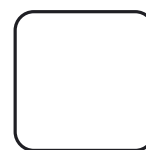

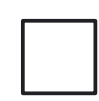

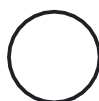

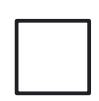

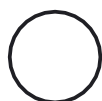

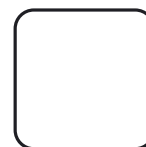

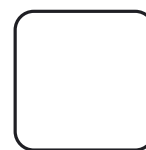

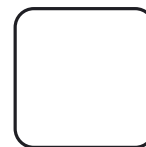

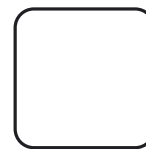

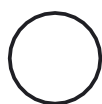

Pattern: ABB

Look at the pattern, then draw what comes next in the empty box.

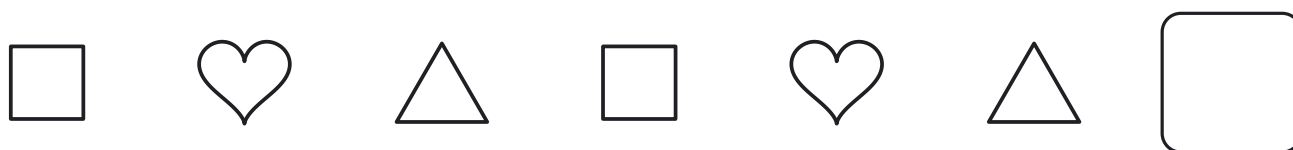

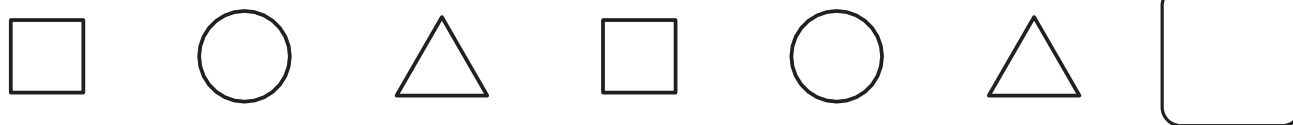

Pattern: ABC

Look at the pattern, then draw what comes next in the empty box.

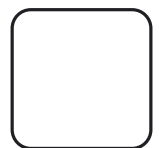

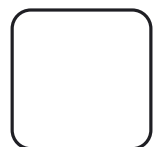

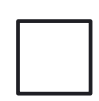

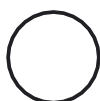

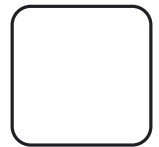

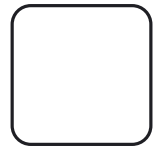

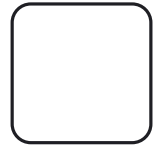

Pattern: ABC

Look at the pattern, then draw what comes next in the empty box.

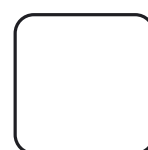

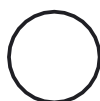

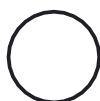

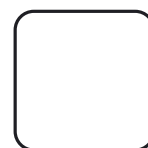

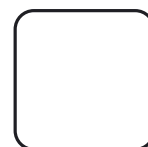

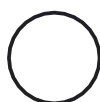

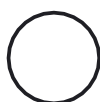

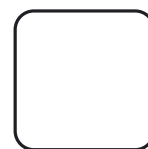

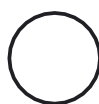

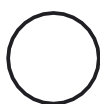

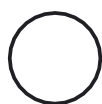

Pattern: ABCD

Look at the pattern, then draw what comes next in the empty box.

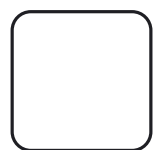

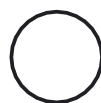

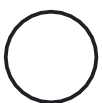

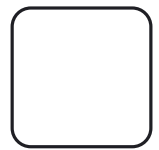

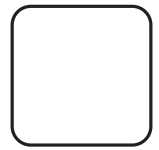

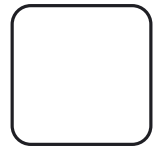

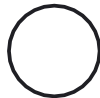

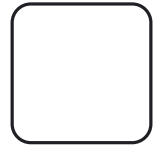

Pattern: AABB

Look at the pattern, then draw what comes next in the empty box.

Pattern: ABCD

Look at the pattern, then draw what comes next in the empty box.

Pattern: size

Look at the pattern, then draw what comes next in the empty box.

Pattern: size

Look at the pattern, then draw what comes next in the empty box.
