

MATH - PLACE VALUE

Tens and Ones Worksheets

Place value to 99, from blocks to digits

4 tens 7 ones
= 47

The 4 in 47 is not four. It is forty, and until that lands every two digit sum is a trick with symbols rather than arithmetic.

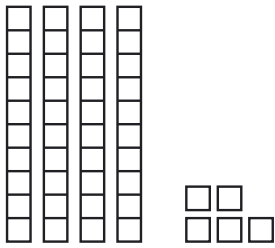

Sheets 1-4 count drawn tens rods and ones. Sheets 5-8 split a number into tens and ones and expanded form. Sheets 9-12 go the other way, and end on the value of a single digit.

Twelve sheets. Answers at the back.

A4 - black ink only - class 1 and 2, ages 5-7
