MATHS - NUMBER BONDS

Number Bonds to 10

60 part-part-whole diagrams, three questions from one picture

A number bond is the same fact asked three ways: give the whole and one part, and the child finds the other; give both parts, and they find the whole.

Knowing the bonds to ten by heart is what makes mental addition possible later. It is worth more than any amount of counting.

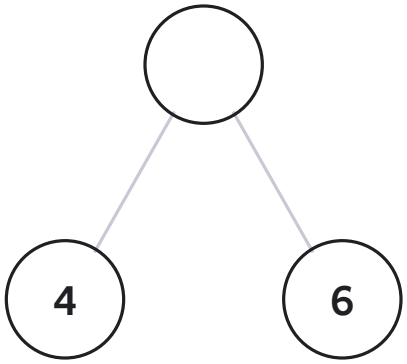

Ten pages of six.

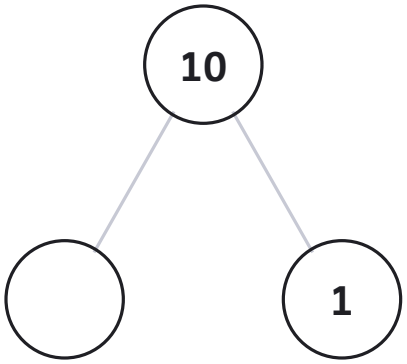

US Letter - black ink only - ages 5-7

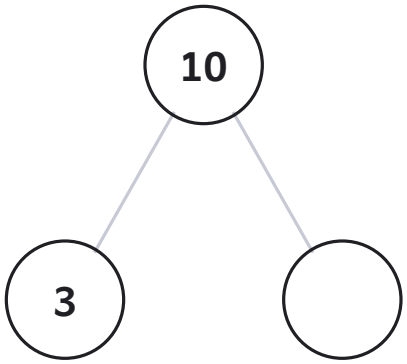

Name _____ Date _____

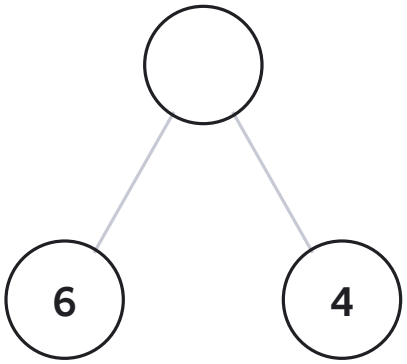

Number bonds to 10

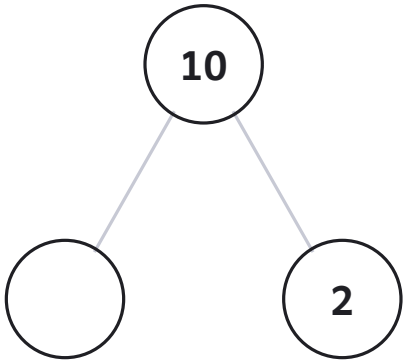

Fill in the empty circle. The two below always make the one above.

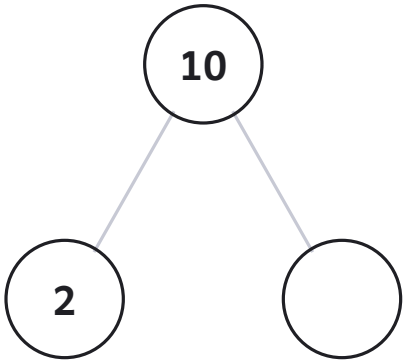

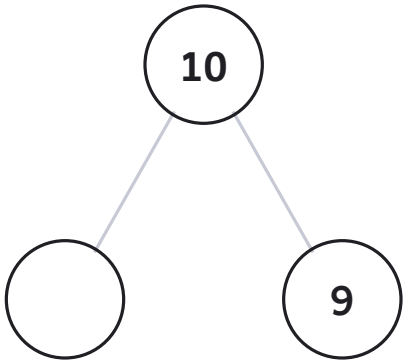

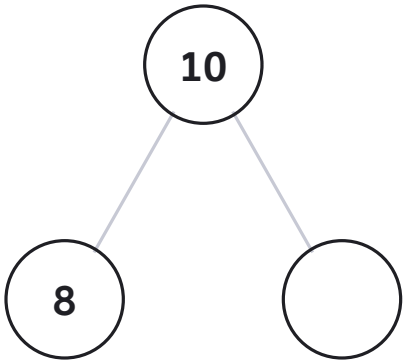

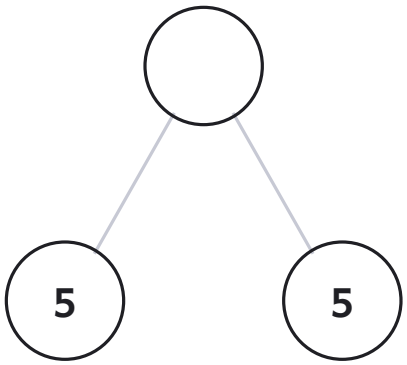

Name _____ Date _____

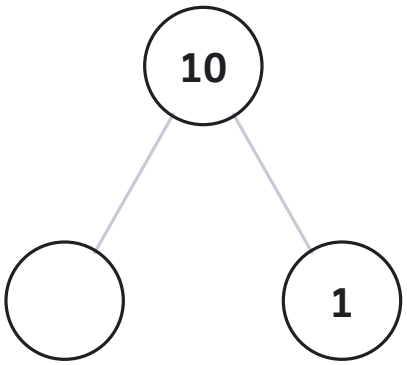

Number bonds to 10

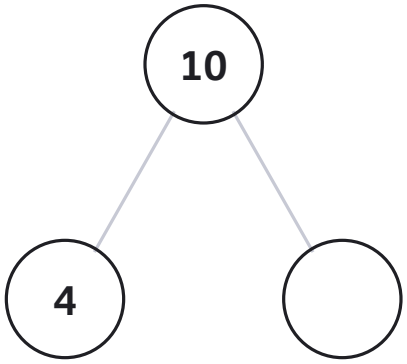

Fill in the empty circle. The two below always make the one above.

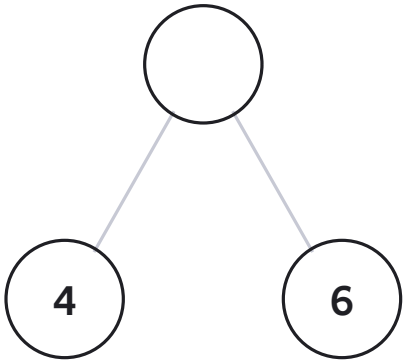

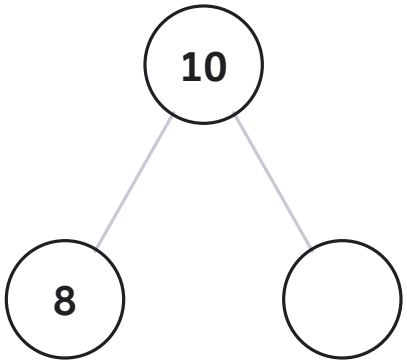

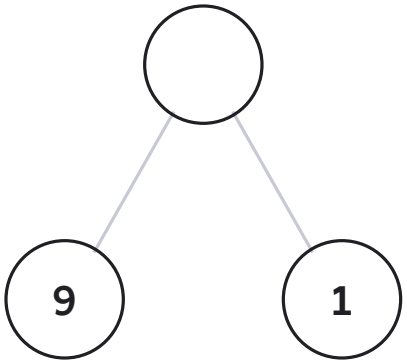

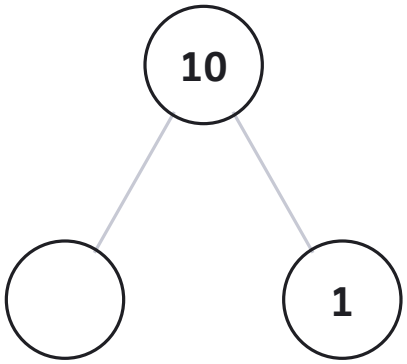

Name _____ Date _____

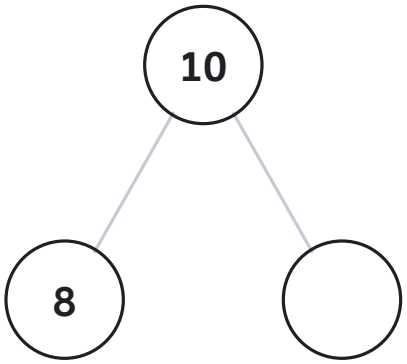

Number bonds to 10

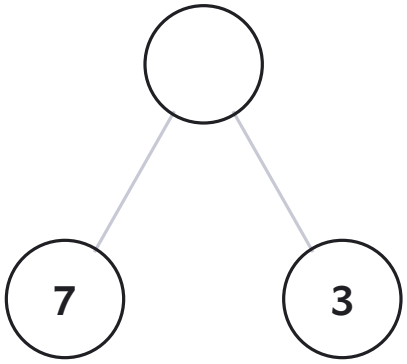

Fill in the empty circle. The two below always make the one above.

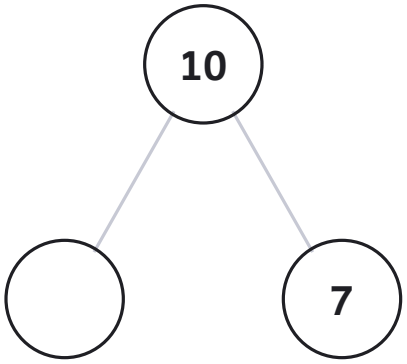

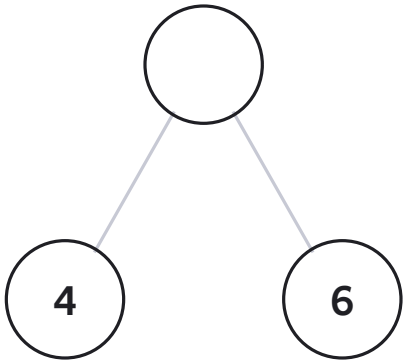

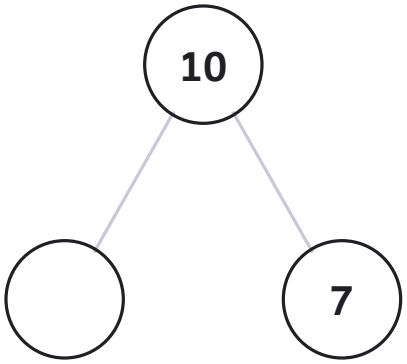

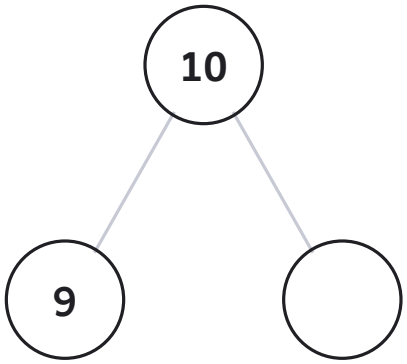

Name _____ Date _____

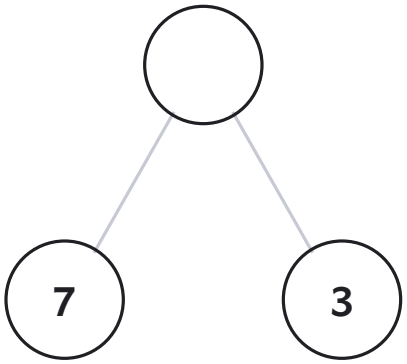

Number bonds to 10

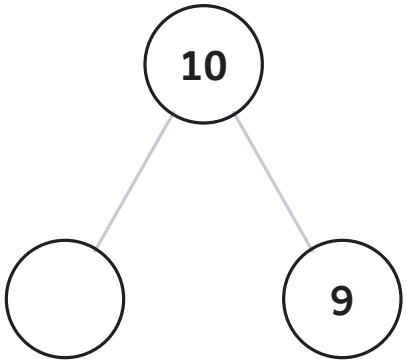

Fill in the empty circle. The two below always make the one above.

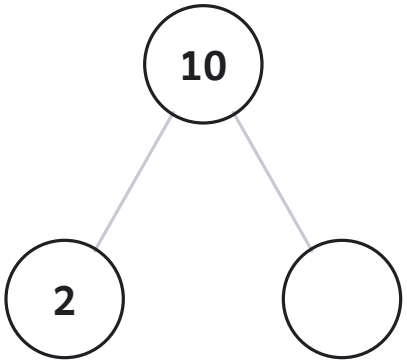

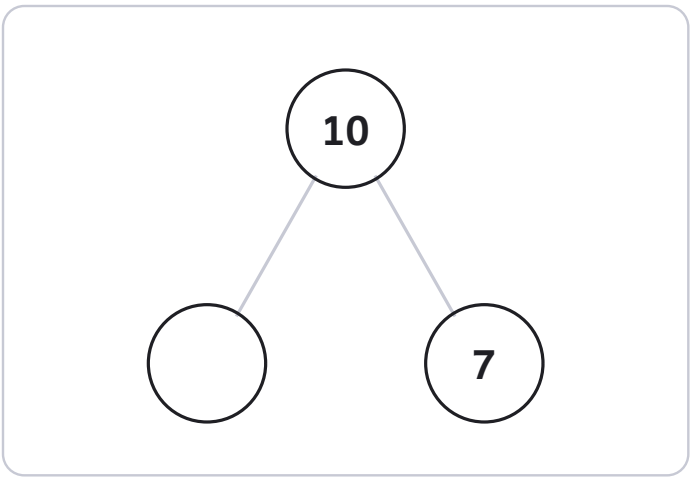

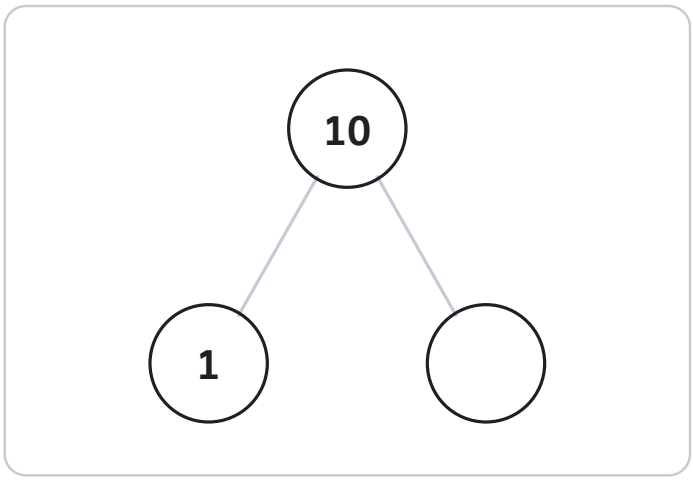

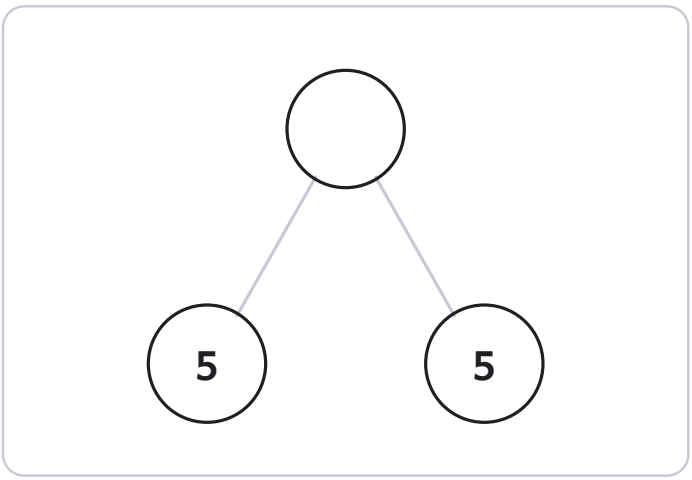

Name _____ Date _____

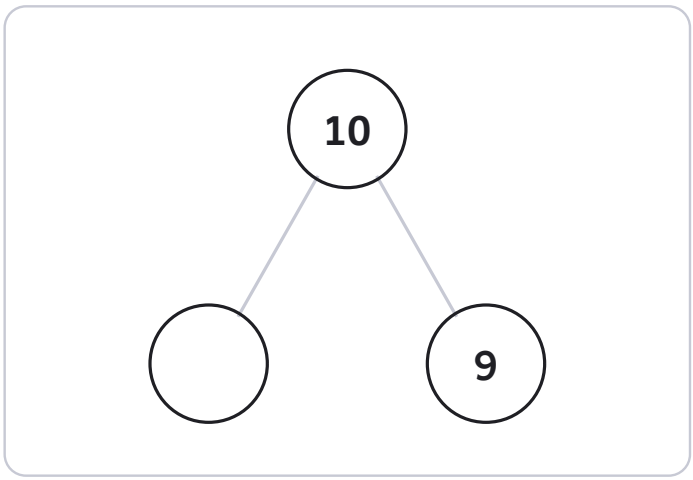

Number bonds to 10

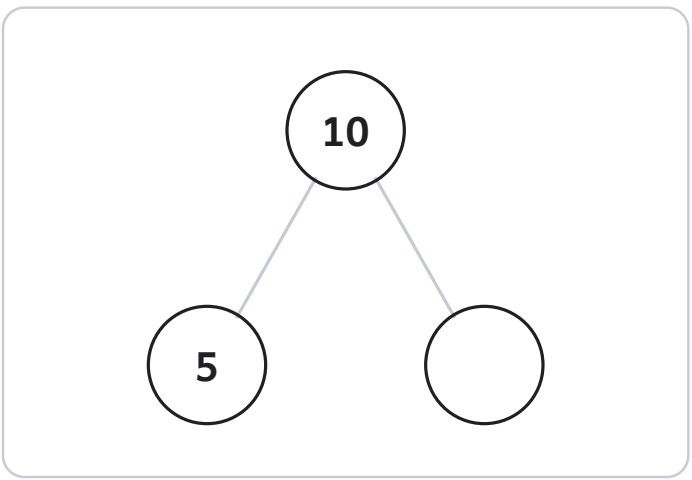

Fill in the empty circle. The two below always make the one above.
