MATHS - COUNTING

Skip Counting by 2, 5 and 10

Twelve sheets of number chains with gaps

2	4	6	8	10

Skip counting is the bridge between counting and times tables. A child who can count in fives to fifty already knows most of the five times table without having met it.

Four sheets each for twos, fives and tens, and a hundred chart at the back to color the pattern in.

US Letter - black ink only - ages 5-8
