REASONING - ATTENTION

Spot the Difference

Ten pairs of pictures, five differences in each

Two boxes, almost the same. Five things are different between them and the child rings each one.

It looks like a game and it trains something specific: comparing two things systematically instead of glancing at both. That is the same habit that catches a misread word later on.

Answers at the back.

US Letter - black ink only - ages 5-8

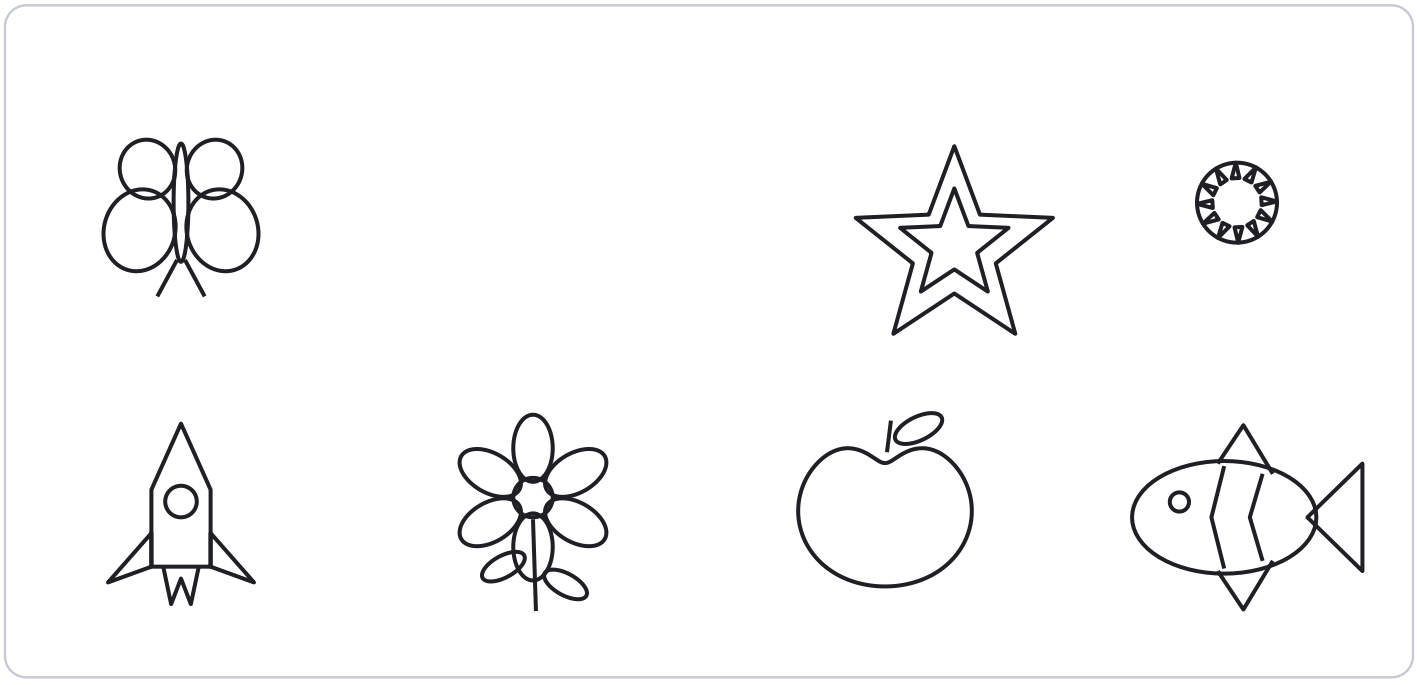

Name _____ Date _____

Five things are different

Ring each difference in the lower box.
